

necessary back-breaking taxes. This class of business executives represents a menace to the system of free enterprise. Their greed has set a bad example to the rest of the citizens of this country. But above all, they imperil our efforts in this crisis.

The easiest way to pull these autocrats down from their thrones is for the stockholders to take action against them. It is true that they

have legally given themselves the power, but only because the stockholders trusted them sufficiently to send them their proxies. They should be made to disgorge and should be removed from power, and in their place we must install men with greater wisdom and integrity so that we will not be led further astray by errors of judgment which have brought us to this pass.

We are facing a crisis of such vast import to our lives that we cannot afford to have either shallowness or viciousness in high places.

Stockholders, what are we going to do about it?

If you wish to join in seeking an answer to this question, write me in care of THE MAGAZINE OF WALL STREET, 90 Broad Street, New York City.
